Professional Summary

Computer Science student and full-stack developer with hands-on experience building, deploying, and shipping real-world web applications and developer products. Proficient in React, JavaScript, Node.js, and MongoDB, with a strong Data Structures and Algorithms foundation and additional hands-on experience in Solana, Rust, and decentralized application development.

Projects

Brutalistic

[GitHub](#) | [Live](#)

- Built and published a reusable React UI component library using Tailwind CSS v4, including modals, tabs, accordions, inputs, switches, cards, badges, and progress components.
- Authored documentation and usage examples to support fast integration across React projects.
- Surpassed 1,200+ downloads through community adoption.

Fitshit

[GitHub](#) | [Live](#)

- Built and deployed a gym-management SaaS platform enabling gym owners to create branded, subdomain-based online websites.
- Implemented membership management with configurable pricing plans, fees, and durations, plus CSV import for onboarding existing member databases.
- Designed member dashboards displaying active plans, membership expiry, and gym updates, replacing manual, spreadsheet-based management.

DevDirect

[GitHub](#) | [Live](#)

- Built and deployed DevDirect, a developer resource discovery platform, with a React frontend and a Node.js/Express/MongoDB backend.
- Designed API-driven search and data management to help developers efficiently discover tools and learning resources.
- Launched the platform publicly and gained real users through organic adoption.

SkillsOnChain

[GitHub](#) | [Live](#)

- Built a decentralized skill-verification platform using Solana and Anchor/Rust, implementing Soulbound Tokens and PDA-based indexing for non-transferable, verifiable credentials.
- Designed a hybrid architecture combining Solana, IPFS, Node.js, and MongoDB for on-chain verification, decentralized metadata storage, and backend indexing.
- Achieved approximately 400ms credential minting and sub-2-second verification on Solana Devnet.

Technical Skills

Languages: C++, Python, JavaScript, Typescript, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Next JS

Backend: Node.js, Express.js, REST APIs, JWT

Databases & Cloud: MongoDB, SQL, Postman, Vercel, Render

Core CS: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Leadership and Campus Involvement

Data Science Lead — GDG On Campus, Dyal Singh College

Dec 2024 – Sep 2025

- Led data science-focused initiatives and technical sessions for the Google Developer Groups On Campus chapter, driving student engagement with hands-on learning content.

Analytics Associate — 180 Degrees Consulting, DSC

Jan 2024 – Oct 2024

- Conducted structured research and analysis, collaborating with a team to develop and communicate data-driven recommendations.

Joint Secretary — ENSO, The Entrepreneurship Society of Dyal Singh College

Jun 2023 – Feb 2024

- Coordinated entrepreneurship-focused workshops, competitions, and initiatives, working with student teams to execute events end-to-end.

Tech Associate — The Consulting Club, Dyal Singh College

Jun 2023 – Nov 2023

- Supported the club's technical operations and digital initiatives as part of the core tech team.

Achievements

- Finalist — Smart India Hackathon 2024, Ministry of Education, Govt. of India | IIT (BHU), Varanasi
- 365-day LeetCode problem-solving Badge; 400-day GeeksforGeeks POTD streak
- Participated in multiple hackathons, including 24-hour hackathons

Education

University of Delhi — Currently pursuing M.Sc. Computer Science

Pursuing

University of Delhi — B.Sc. (Hons.) Computer Science

CGPA: 8.3
